

Kentucky Radon Zone Map

Average Radon Levels by County - May 2004

0 60 120 Miles

Notes:

* Radon levels are measured in "picocuries per liter" or "pCi/L". The higher the level, the greater the risk from long-term exposure. EPA recommends that you take action to reduce radon if the radon level in your home is 4 pCi/L or higher. Source: EPA. 2002. "A Citizen's Guide to Radon".
